MEMORANDUM.

Dated 1st January 1915.

Australian fruit trees do much better in India than those imported from European countries on account of similar by of climate and coincidence of season; but they do not keep long in pots and should be planted out in their permanent places on arrival. This precludes keeping a stock of these on hand in the Lal-Bagh until our own stock is ready for

It is therefore intended to import a large number direct from Australia, same as in previous years, and distribute them to intending growers immediately on arrival about the beginning of July next. Before sending in the indent it is necessary that some idea should be had as to the approximate demand. Will therefore gentlemen as are desirous of availing themselves of the opportunity, oblige by informing the undersigned before the 15th March 1915, the kind, variety and number of fruit plants they want stating their address in full and the Railway Station to which the parcel should be booked.

A list of fruit trees intended to be imported is herein attached with approximate prices as delivered at the Lal-Bagh, Bangalore. All charges for packing and forwarding to destination would be extra.

> G. H. KRUMBIEGEL, Economic Botanist.
